Who We Are

GB Shipping Italy is a young company, established in 2016 by people from other companies in the industry with proven experience in the field of logistics.

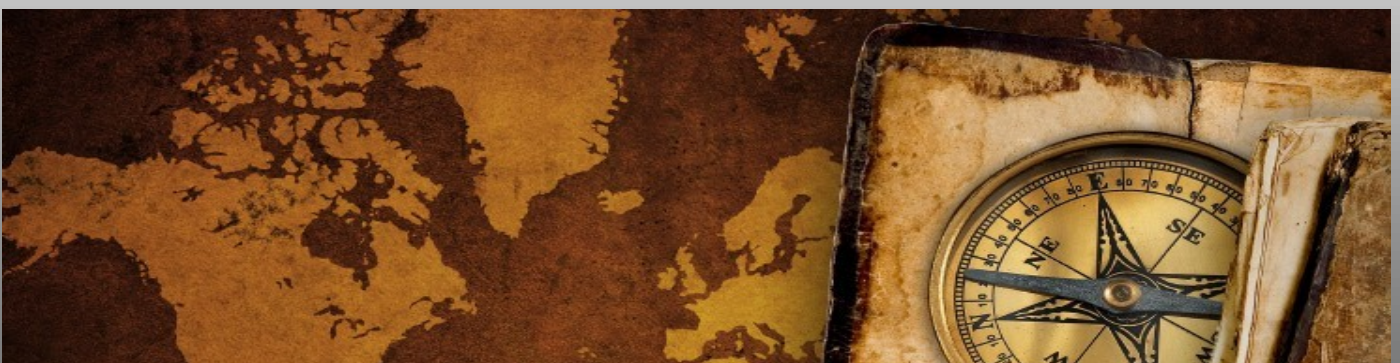

The company's headquarters is located in Milan, a city well-known for being the economic heart of Italy and one of the largest European and global commercial centers. This enables us direct contact with leading logistics companies in the Italian market.

Our business is mainly focused on giving a service to direct shippers or shippers, worldwide, for the transport of goods that cannot be loaded on ships of both maritime and air shipping companies that have regular services.

We intervene when the chartering becomes indispensable to move goods, particularly about project cargo and explosive goods, belonging to the classes IMO 1.1, 1.2, 1.3

We can do all this thanks to the dense network of contacts we have with thousands of shipowners who send us daily the position of their ships and airlines who send us the positions of their aircrafts.

Our Services

Maritime Chartering

GB Shipping acts as a maritime broker, a particular service we give to our customers in shipping worldwide. Our network of contacts with thousands of owners of tramp break bulk ships from around the world, from the biggest and best known to the smaller and lesser-known but equally valid and that have an extensive presence in certain sectors worldwide, allows us to have a global coverage availability of ships.

Our service is especially dedicated to project cargo.

Aircraft Chartering

Air chartering is a type of transport that is becoming increasingly popular today.

At the expense of the high cost this type of transport may require, often the needs of a rapid delivery / receipt of certain types of goods, require the need for a dedicated air transport.

Our relationships with some of the best airlines in the world, allow us to offer our customers a type of personalized service at very competitive rates.

This service is dedicated in particular to shippers anywhere in the world.

Transport of Defense Material

Another branch of the GB shipping assets is the transport of defense equipment, especially heavy weapons, dedicated to world leaders of this production or the governments of various countries of the world.

GB Shipping for such transport is able to offer a door / door service thanks to a dense network of agents, transporters, airlines and shipping companies specialized in this type of transport. Normally the IMO class 1, in particular the classes IMO 1.1 / 1.2 / 1.3 are not accepted by regular shipping liner carriers. This is the exact moment GB Shipping comes into play, proposing alternative solutions able to satisfy our customers.
